TECHNOLOGY IN MOTION

MACO MULTI

TURN-ONLY AND T&T HARDWARE

What does ease of use mean for your daily life?

COMFORT FITTINGS

MACO MULTI

Life without obstacles

Opening a window easily and unaided should be a normality not a luxury. There should be no barriers to opening a window, even for those who are smaller and weaker than the average middle aged person without the same reach. Perhaps the operator is confined to a wheelchair and cannot reach the handle, or they are simply too frail and do not have the required strength. Normality, a strong guiding principle for barrier freedom.

Barrier-freedom for all!

MACO MULTI

T&T window with MULTI comfort fittings

Product description

- For PVC and timber up to a maximum sash weight of 80 kg
- Fitting axis 9 and 13 mm
- Comfort scissor stay compatible with MULTI-TREND and MULTI-MATIC
- Maximum sash rebate width 1400 mm, maximum sash rebate height 1600 mm
- Tilt opening width more than 100 mm
- Completely interconnected locking from our standard product range
- T&S handle
- MACO twist lock prescribed for bottom horizontal handle position
- Optional corrosion-resistant TRICOAT-PLUS surface

MACO MULTI

Tilting & closing is effortless

As easy to open as your laptop. The long handle body (lever action) of the MACO-SKB handle reduces the effort required to operate the handle.

Comfort for every user

The MULTI comfort fittings window handle is placed such that it is accessible to every user.

Users can close or tilt the window without having to use their own pulling or pushing strength. The work is done for them by the MULTI comfort fittings.

- Handle can even be used while sitting down for normal window heights
- Long MACO T&S handle for greater leverage
- Minimal strength required to use the handle
- Suitable for the mobility impaired
- Ideal also for windows that are hard to access
- Barrier-freedom for all

MACO MULTI

Window handle within reach

When the window handle is turned through 180degrees, the interconnected locking mechanism mechanically transmits the tilt or close instruction to the scissor-stay arm of the comfort scissor stay.

Also for windows that are difficult to reach

If the window is built above normal height or access is restricted by a built-in unit – such as a kitchen unit – the handle position at the bottom part of the opening sash makes daily use of the window easier for all users, whether in the bathroom, kitchen or stairway.

MACO MULTI

Life is sometimes hard enough as it is

When the handle is turned 180 degrees, the central lock that is connected all round transfers the tilt or close command to the scissor arm of the comfort stay.
The window tilts and closes without any extra effort.

The 90-degree position of the handle and release of the twist lock put the window in turn mode.

Because of the longer MACO T&S handle, minimal strength is required to use the window.

MACO MULTI

Your benefits at a glance

No need to exert physical force: MULTI comfort fittings

Window handle within reach

The MACO T&S handle is at a low level - positioned horizontally or vertically on the bottom casement. The T&T window can also be operated seated, when installed higher than normal or in locations that are difficult to access (for example, behind a fitted kitchen.

Lever action

The MACO T&S handle is much longer than a standard window handle. Its enhanced lever action considerably reduces the force required to operate the handle.

Tilting & closing no need to pull or push

The user turns the handle to the 180° position.
The central lock connected around it then transfers the tilt command to the scissor arm, which automatically moves out more than 100 mm. The MULTI comfort fittings hardware operates in the same manner when closing.

Burglary resistance included

The MULTI comfort fittings hardware can be adapted for burglary resistance up to RC 2 by using i.S. security roller pins and strikers.

TRICOAT-PLUS

The comfort fittings hardware is also available with corrosion-resistant TRICOAT-PLUS for surfaces that are exposed to rugged environments.

MACO MULTI

Barrier-free for all. Naturally!

MACO-MULTI comfort fittings allow everyone to use a tilt&turn window without restriction.

In any installation, situation and at any age.
